

# Madonna di Campiglio

## Skiing in Madonna di Campiglio

As the ski area is so high up, there is always snow guaranteed during the season, but should there be a year with a little snow after all, there are no problems as there are 564 snow cannons that ensure snow on 20 km of slopes. If your skiing is at an intermediate level, it is perfect to go on a ski trip to Madonna di Campiglio. Here there are wonderful long slopes to slide down at a reasonable pace through the forest.

Ski trips must also include a snow park, which of course there is in Madonna di Campiglio. The snow park is a whopping 50,000 square meters, so you definitely won't get bored here! If you prefer to stay on flat ground, your skiing holiday can instead be spent on the 40 km long cross-country skiing trails.
